

# Future Electronics Introduces Renesas RA4M3 to Extensive MCU Portfolio

News-Press Release

Pointe Claire, Quebec, (Newsbox) 13-Jan-2021

<https://prsafe.com/release/13262/>

## Summary

Future Electronics is introducing the Renesas RA4M3 MCU group.

## Message

Montreal, Canada (prsafe) January 14, 2021 - Future Future Electronics, a global leading distributor of electronic components, is expanding their inventory of Renesas' RA4 series of MCUs, now introducing the RA4M3 group to their lineup.

The new Renesas RA4M3 group, based on the latest Arm® Cortex® -M33 Core with TrustZone, has increased 1 MB on-chip Flash and 128 KB on-chip RAM. The MCU's integrated Standby RAM along with the low-power consumption of the Renesas 40nm process is the optimum for low power applications. The memory block swap feature, new on the RA4 series, in conjunction with the Security Crypto Engine is making the RA4M3 the best choice for applications where in-field firmware updates are required.

## About Future Electronics

Future Electronics is a global leader in electronics distribution, recognized for providing customers with global supply chain solutions, custom-tailored engineering services and a very extensive variety of electronic components. Founded by Robert G. Miller in 1968, Future Electronics believes its 5000 employees are its greatest asset, with 170 offices in 44 countries. Future Electronics is globally integrated, with a unified IT infrastructure that delivers real-time inventory availability and access to customers. With the highest level of service, the most advanced engineering capabilities, and the largest available-to-sell inventory in the world, Future's mission is always to Delight the Customer®.
