Summary

Future Electronics is featuring the ON Semiconductor FUSB3307 USB-PD3.0 Adaptive Source Charging Controller.

Message

Montreal, Quebec (prsafe) January 15, 2021 - Future Electronics, a global leading distributor of electronic components, is featuring ON Semiconductor's FUSB3307 USB-PD3.0 Adaptive Source Charging Controller.

USB Power Delivery (PD3.0) Travel Adapters, Hubs, and Power Banks can now take advantage of ON Semiconductor's highly integrated FUSB3307 USB-PD3.0 Adaptive Source Charging Controller. Compliant to PD 3.0 v1.2 and Type-C r1.4, the FUSB3307 allows for Programmable Power Supplies (PPS), supporting a minimum of 3.3V and maximum of 21V output voltage control. Output voltage, current, IC internal temperature and external temperature via an NTC resistor can all be monitored. An easy to use development tool is available with the Strata enabled STR-FUSB3307MPX-PPS-GEVK. Through the Strata UI, the developer can control the parts features as well as access the most up to date datasheets, BOMs, schematics and other collateral.

About Future Electronics

Future Electronics is a global leader in electronics distribution, recognized for providing customers with global supply chain solutions, custom-tailored engineering services and a very extensive variety of electronic components. Founded by Robert G. Miller in 1968, Future Electronics believes its 5000 employees are its greatest asset, with 170 offices in 44 countries. Future Electronics is globally integrated, with a unified IT infrastructure that delivers real-time inventory availability and access to customers. With the highest level of service, the most advanced engineering capabilities, and the largest available-to-sell inventory in the world, Future's mission is always to Delight the Customer®.
