

# DF40 Series FPC to Board Connectors from Hirose Featured in THE EDGE by Future Electronics

News-Press Release

Pointe Claire, Quebec, (Newsbox) 16-Dec-2021

<https://prsafe.com/release/13993/>

## Summary

Future Electronics is featuring Hirose's DF40 connectors in this month's IoT & Connectivity edition of THE EDGE.

## Message

Montreal, Canada (prsafe ) December 16, 2021 - Future Electronics, a global leading distributor of electronic components, is featuring ultra-compact connectors from Hirose in the latest edition of THE EDGE - IoT & Connectivity.

The Hirose Electric DF40 series connectors are slim FPC to board connectors that have a 0.4 mm pitch and 1.5 mm stacking height. They also feature a unique space-saving design, several available stack heights, strong contact forces and a reinforced structure.

Despite the connectors' small size and low profile the contacts provide strong contact forces and long contact wipe (0.45 mm), guaranteeing reliable electrical and mechanical performance. The connectors will self-align within 0.33 mm, and a positive "click" sensation confirms correct insertion and connection of all contacts.
