Summary

Future Electronics, a global leading distributor of electronic components, is featuring four DC-DC converter families in a recently-launched worldwide campaign.

Message

Montreal, Canada (prsafe) June 20, 2022 - Future Electronics, a global leading distributor of electronic components, is featuring four DC-DC converter families in a recently-launched worldwide campaign.

MINMAX supplies the MDW(I)15 and MDW(I)12 DC-DC converter families, offered in 15 W and 12 W respectively. They feature wide voltage and ambient temperature ranges in addition to the necessary safety features to enable design flexibility in key end designs.

These DC-DC converters occupy just 0.5in² of PCB space within a small encapsulated industry-standard DIP-16 package, making them ideal for space-constrained applications.

To learn more about these featured DC-DC converters, visit
