### Summary

SelecTech, Inc., a leader in the manufacture of innovative flooring products with long-term value and immediate benefits, will literally have the floor at the 33rd annual meeting of the Scientific Equipment and Furniture Association (SEFA).

### Message

Orlando, FL and Avon, MA, November 01, 2022 -- SelecTech, Inc., a leader in the manufacture of innovative flooring products with long-term value and immediate benefits, will literally have the floor at the 33rd annual meeting of the Scientific Equipment and Furniture Association (SEFA). SelecTech represents the only flooring company in SEFA, which boasts a membership of individuals and companies from all over the world. "The annual meeting takes place November 9-11 at the Omni Hotel Championsgate in Orlando, Florida. SelecTech will exhibit and participate in a meeting of the Flooring committee. SelecTech President Tom Ricciardelli chairs the committee. "Over the past few years, we have been developing test standards for lab flooring. Currently, none exist. That makes it difficult for facility owners and lab managers to select flooring that meets the needs of their lab," said Ricciardelli. "At the annual meeting, the committee will meet to continue developing these standards." For its lab and cleanroom clients, SelecTech offers its PolyStyle resinous flooring, GroundFloor sheet flooring, and its FreeStyle BioLock product. With its patented interlocking feature, BioLock can be customized for use in hospitals, cleanrooms and labs. Ideal for renovation projects, BioLock eliminates the need for costly floor replacement and downtime. BioLock also utilizes a water-proof seam sealer that makes tiles liquid-tight but still removable and replaceable. This is a critical feature when you consider that some labs might be using chemicals that could be damaging if spilled and seeps into flooring. This is particularly important to protect the wiring and plumbing that are often underneath a lab's floor. Additionally, most medical centers and hospitals house data centers with expensive computer equipment and servers. SelecTech also offers all of its products in ESD versions, which are used by a number of facilities with more expensive electronics to reduce static electricity discharge. "A number of the facilities we've worked with over the years use access flooring. This type of floor provides some flexibility should the facility need to accommodate growth or transfigurations. Our interlocking flooring"available in both FreeStyle and StaticStop lines--can be moved from one location to another and easily reinstalled," said Ricciardelli. Made with 70 percent recycled materials and 100 percent recyclable, SelecTech flooring products meet CA 1350 Indoor Air Quality and is MAS Certified Green. To request a sample of SelecTech flooring products or to learn more about the medical facilities uses for SelecTech products, please call 508-583-3200 or visit [www.selecttechinc.com](http://www.selecttechinc.com). For more information on SEFA and the annual meeting, visit [www.sefalabs.org](http://www.sefalabs.org). About SelecTech, Inc.: FreeStyle is a division of SelecTech, Inc., which was founded in 1993 with the mission of creating valuable products from scrap plastics. The company has become a leader in the manufacture of flooring products from recycled materials and uses one million pounds of recycled materials annually. Their products are made with up to 100 percent recycled content, are 100 percent recyclable and installed without adhesives making them some of the "greenest" and most cost-effective flooring products available. The unique interlock system on SelecTech's flooring products enable them to be installed at a much lower cost, without a lot of costly downtime, which provides significant value to customers. Using state-of-the-art technology and innovative product design, SelecTech has also created the top performing Place N Go residential flooring products, which are available at Home Depot. They are also the creators and manufacturers of StaticStop ESD flooring products. SelecTech is a vendor partner of Health Care Institute (HCI), an International Facility Management Association (IFMA) alliance partner and Starnet, an international flooring contractor cooperative. The company is headquartered at 33 Wales Avenue, Suite F in Avon, MA. For more information about SelecTech, visit <http://www.selecttech.com>.
