Summary
Future Electronics has featured the DIODESâ„¢ AP7354 Low Dropout Voltage Regulator in the latest edition of THE EDGE newsletter.

Message
Montreal, Canada (prsafe) May 19, 2023 - Future Electronics, a leading global distributor of electronic components, recently featured the DIODESâ„¢ AP7354 Low Dropout Voltage Regulator in the latest edition of THE EDGE.

With a low quiescent current, the AP7354 minimizes power consumption, making it suitable for battery-powered applications. The regulator also provides excellent line and load regulation, ensuring a stable and accurate output voltage under varying conditions. With a wide input voltage range and high voltage withstand capability, the AP7354 offers versatility and robustness for different operating environments.

The AP7354 features a built-in thermal shutdown and current limit protection, enhancing system safety and reliability. The regulator is a high-performance device that meets the demands of various power management applications.

To learn more about the AP7354 regulators, including more tech specs and features, please visit: www.FutureElectronics.com/resources/featured-products/diodes-incorporated-ap7354-low-dropout-voltage-regulator. To see the entire portfolio of products available through Future Electronics, visit: https://www.FutureElectronics.com

THE EDGE is the latest e-newsletter from Future Electronics and is geared toward engineers and buyers looking for new or leading-edge products. THE EDGE comes out twice per month, and each edition features product information, datasheets and videos showcasing the most advanced new technology in a specific area, such as sensing, lighting, or automotive.

Register here to receive the latest issues of THE EDGE newsletter, and stay up to date with the newest technologies.

About Future Electronics

Future Electronics is a global leader in electronics distribution, recognized for providing customers with global supply chain solutions, custom-tailored engineering services and a comprehensive suite of passives and semiconductor products. Founded in 1968, Future Electronics has over 5,500 employees and operates in 170 offices in 45 countries around the world. Future Electronics is globally integrated, with a unified IT infrastructure that delivers real-time inventory availability and access to customers. With the highest level of service, the most advanced engineering capabilities, and the largest available-to-sell inventory in the world, Future's mission is always to Delight the CustomerÂ®. For more information, visit www.FutureElectronics.com.
