Summary

Future Electronics has featured the Microchip SAMA5D2 family of microprocessors in the latest edition of THE EDGE newsletter.

Message

Montreal, Canada (prsafe) May 24, 2023 - Future Electronics, a leading global distributor of electronic components, recently featured the Microchip SAMA5D2 Microprocessors (MPUs) in the latest edition of THE EDGE.

Built upon the ARM Cortex-A5 core, these microprocessors offer a balance between performance and power efficiency, making them ideal for applications requiring real-time processing capabilities. The SAMA5D2 series boasts a rich set of peripherals, including Ethernet, USB, CAN, and LCD controllers, providing flexibility and connectivity options for various designs.

With integrated security features such as secure boot and encryption engines, these microprocessors ensure robust system protection. Furthermore, the SAMA5D2 series offers a comprehensive software ecosystem, including Linux and RTOS support, enabling developers to accelerate their time to market.

To learn more about the SAMA5D2 group, including more tech specs and features, please visit:
