

Future Electronics Future Electronics Highlights E-Switch's Extensive Range of Anti-Vandal Switches

News-Press Release

Pointe Claire, Quebec, (Newsbox) 13-Oct-2023

<https://prsafe.com/release/16021/>

Summary

Future Electronics is featuring a large selection of E-Switch anti-vandal switches in a recently-launched digital campaign.

Message

Montreal, Canada (prsafe) October 13, 2023 - Future Electronics, a leading global distributor of electronic components, excited to feature E-Switch's comprehensive lineup of anti-vandal switches.

These robust and dependable switches cater to a diverse range of applications, from industrial and commercial equipment to security systems and consumer electronics.

E-Switch offers an extensive range of vandal-resistant switches that can be ordered prewired as a stock item. The optional prewired feature is available for the PV series and ULV series anti-vandal products. In addition to the direct wired option, the PV series switch line offers a socket extension to quickly and easily connect power behind the equipment panel. Both options eliminate second sourcing of wire lead purchase and assembly and reduces in-house assembly labor, which saves time and money.

For more information about E-Switch's Anti-Vandal Switches and other electronic components available through Future Electronics, please visit www.FutureElectronics.com/resources/featured-products/e-switch-anti-vandal-switches.
