Summary
What keeps most people from visiting the dentist?. Fear! Fear of pain, fear of being judged. Approximately 36% of Americans avoid dental visits due to fear of pain, according to the Cleveland Clinic

Message
Assonet, MA, September 11, 2024 -- What keeps most people from visiting the dentist?. Fear! Fear of pain, fear of being judged. Approximately 36% of Americans avoid dental visits due to fear of pain, according to the Cleveland Clinic, a nationally respected source for health information. Â Woodside Dental Care, located in Assonet, MA, is focused on removing those fears and providing a better dental experience, focusing on connecting with patients and building meaningful, long-lasting relationships. Patient comfort is the top priority, and the practice is continuously incorporating new technologies and techniques to minimize pain and anxiety. Â Dental anxiety and fear often stem from previous painful experiences, fear of needles, or general anxiety about dental procedures. Â Woodside Dental Care and modern dentistry have made significant strides in reducing pain and discomfort which can help alleviate some of these fears. Â Examples of Innovative Techniques: Â Strong Topical Anesthetic are utilized. Before Needle Injection pre-emptive measures are taken. To minimize the pain and fear associated with needles, Woodside dentists use a strong topical anesthetic before administering any numbing injections. This approach significantly reduces discomfort and helps alleviate anxiety for patients who may be apprehensive about the procedure. Â Better Local Anesthetics. Modern local anesthetics are more effective and act faster, providing better pain control during procedures. Â Composite Resins. Newer filling materials bond better to teeth, requiring less removal of healthy tooth structure, which reduces discomfort. Â Electric Handpieces. Powerful and quieter, Woodside dentists use electric handpieces that are more powerful and quieter than traditional air-driven handpieces. This technology not only improves the efficiency and effectiveness of dental procedures but also reduces the intimidating noise, creating a more calming environment for patients. Â Digital Impressions. No More Goopy Impressions. Woodside dentists have replaced traditional impression methods with digital impressions. This means no more goopy, nasty-tasting, gag-inducing impressions. Digital impressions are quick, accurate, and much more comfortable for patients, enhancing their overall experience. Â New Dental Chairs. Woodside Dental is equipped with the latest dental chairs designed for maximum comfort, ensuring that patients can relax during their procedures. Â Ceiling-Mounted TVs - To help distract and entertain patients during their visits, Woodside installed TVs on the ceiling. This provides a pleasant diversion and helps make the time spent in the chair feel shorter and more enjoyable. Â Warm and Comforting Environment. Woodside is designed to be welcoming and comfortable, with a warm and friendly atmosphere that helps put patients at ease from the moment they walk in. Â Woodside Dental Care continuously seeks out and implement new technologies and techniques to ensure that patients receive the highest quality care in the most comfortable setting possible.Â Â About Woodside Dental Care: Woodside Dental Careâ€™s mission is to not only maintain a healthy smile, but to completely change perceptions of dentistry and challenge the idea that going to the dentist is unpleasant. Â Woodside offers high quality care, maximum convenience, and the kind of friendly service youâ€™d expect at a small Mom & Pop store. For information, visit the offices at 36 South Main Street, Assonet, MA, via the web at https://www.woodsidedental.com/ or call (508) 452-6302.
