Summary
Future Electronics is participating in Future Tech Day in Hefei on September 25th, focusing on innovations in automotive technology. Attendees will gain valuable insights from electronics industry leaders through presentations and demos, highlighting trends in automotive electronics.

Message
Shanghai, China (prsafe) September 18, 2024 - Future Electronics, a global leader in electronics distribution, is excited to announce the upcoming "Future Tech Day" portion of the 2024 China Tech Day seriesâ€”focusing on the automotive industry. The event will take place on Wednesday, September 25th in Hefei, with another session planned in Hangzhou later this year.

The theme of this year's Future Tech Day is "Driving Innovation in Automotive in China." The event will showcase cutting-edge semiconductor solutions from leading global suppliers, offering attendees the opportunity to explore the latest advancements in automotive technology.

With a strong focus on market trends and technological evolution, the event will provide insights into the future of industrial automation and automotive electronics. Attendees will also have the opportunity to collaborate with international partners on innovative product solutions, further driving innovation within the automotive sector. Future Electronics' Advanced Engineering Group will present forward-looking solutions that help companies accelerate their research, development, and product iteration. Participants will also benefit from hands-on demonstrations and direct communication with technical experts, allowing them to exchange ideas and enhance their understanding of electronics design.

Following Future Electronics' presentation, the event will feature presentations from leading semiconductor companies, including Renesas, onsemi, Nexperia, Microchip, and ST. Each will discuss technological advancements and product innovations aimed at empowering China's automotive electronics ecosystem. Attendees will gain valuable insights into high-performance computing solutions for software-defined vehicles, cutting-edge power devices, and other key technologies that are driving the future of automotive applications.

Future Electronics believes this important event will offer a unique platform for networking, knowledge sharing, and exploring the future of automotive innovation.

About Future Electronics:

Founded in 1968, Future Electronics is a global leader in the electronic components industry. Future Electronics' award-winning customer service, global supply chain programs and industry-leading engineering design services have made the company a strategic partner of choice.

Headquartered in Montreal, Canada, Future Electronics operates in 159 offices across 44 countries with over 5,000 employees. Its worldwide presence powers the company's outstanding service and efficient, comprehensive global supply chain solutions. Future Electronics is globally integrated and supported by one IT infrastructure which provides real-time inventory availability and enables fully integrated operations, sales and marketing services worldwide. In 2024, Future became a WT Microelectronics company, now dual-headquartered in both Montreal, Canada and Taipei City, Taiwan.

Future Electronics' mission is always to Delight the CustomerÂ®. For more information visit www.FutureElectronics.com.
