Summary

Expert Exteriors, a Northern Virginia exterior renovation company, explains how outdated or damaged windows may contribute to higher utility costs and reduced energy efficiency in their latest blog.

Message

Fairfax, VA (prsafe) July 8, 2025 - Expert Exteriors, a leading provider of [exterior home services in Northern Virginia and Maryland](#), has published a new blog post titled "How to Tell If Your Windows Are Costing You Money on Energy Bills." The article helps homeowners identify key signs that indicate when [window replacement may be necessary due to energy inefficiency](#) or performance failure.

According to the U.S. Department of Energy, up to 30% of residential heating and cooling is lost through inefficient windows. In the blog, Expert Exteriors outlines practical indicators of window failure, such as noticeable drafts, rising utility bills, temperature inconsistencies, condensation between panes, and difficulty opening or closing windows. The presence of any of these issues may suggest poor insulation performance and the need for an upgrade.

The blog also emphasizes that aging or single-pane windows are among the most common culprits of unnecessary energy loss. Modern alternatives—including ENERGY STAR® certified windows—use multiple panes, insulated frames, and low-emissivity (low-e) coatings to prevent heat transfer and reduce HVAC strain. Homeowners who choose to replace outdated units can expect improved indoor comfort, reduced noise from outside, and lower monthly energy bills.

Expert Exteriors encourages local homeowners to consider proactive window replacement as a long-term solution to improve energy performance and align with current efficiency standards. Whether upgrading for comfort, performance, or cost savings, the company offers customized installation services with minimal disruption and a focus on direct communication throughout the project.

To learn more about energy-saving window replacement, contact Expert Exteriors at (703) 278-3315 or visit their website at <https://exexteriors.com/>. Expert Exteriors is headquartered at 3719 Hill St, Fairfax, VA 22030.
