Summary

Through its Build Hope Together charitable foundation, Future Electronics recently made a generous contribution to Fondation Charles-Bruneau, advancing pediatric cancer research and improving the quality of life for children in remission across Quebec.

Message

Montreal, Quebec (prsafe) November 13th, 2025 - Future Electronics, a global leader in electronic components distribution, is proud to announce its continued support of Fondation Charles-Bruneau, a Quebec-based organization dedicated to financing research and supporting the development of projects in the area of pediatric hematology and oncology.

Future Electronics' recent donation supports the foundation's ongoing mission to ensure that every child with cancer in Quebec has the best possible chance of recovery. Since 1990, Fondation Charles-Bruneau has distributed more than \$100 million to Quebec-based university hospital centres helping establish specialized pediatric oncology units and advancing precision medicine in childhood cancer care.

"Our collaboration with Fondation Charles-Bruneau reflects what Build Hope Together stands for—using collective action to bring hope, healing, and progress to our communities," said Georgia Genovezos, Corporate Vice President of Digital Marketing at Future Electronics.

Future Electronics' Build Hope Together foundation was launched in 2024 to empower employees to identify and support causes that create lasting social impact. Fondation Charles-Bruneau was selected for its exceptional transparency, measurable outcomes, and alignment with the foundation's mission to help sick children, underprivileged youth, and women at risk.
