Summary

Future Electronics, a leading global distributor of electronic components, has launched a new digital campaign featuring onsemi's Continuous Glucose Monitoring (CGM) System Solutions.

Message

Montreal, Canada (Â prsafe) November 28, 2025 -Â Future Electronics, a leading global distributor of electronic components, has launched a new digital campaign featuring onsemi's Continuous Glucose Monitoring (CGM) System Solutions.

The system pairs the CEM102 analog front end with the RSL15 Bluetooth Low Energy wireless MCU to create a compact, ultra-low power platform for electrochemical sensing and wireless communication. This combination is ideal for applications such as continuous glucose monitors, wearable health devices, and connected IoT sensors. The CEM102 is designed for amperometric measurements and ultra-low current detection, while integration with the RSL15 enables a complete two-channel electrochemical measurement system that operates efficiently with minimal power and a small footprint.

To accelerate development, onsemi provides an evaluation board including both the CEM102 and RSL15, along with sample firmware to simplify system setup and measurement routines.

To learn more about onsemi Continuous Glucose Monitoring System Solutions and explore the full range of products available through Future Electronics, visit theÂ [dedicated campaign page](#).

About Future Electronics

Founded in 1968, Future Electronics is a global leader in the electronic components industry. Future Electronics' award-winning customer service, global supply chain programs and industry-leading engineering design services have made the company a strategic partner of choice.

Headquartered in Montreal, Canada, Future Electronics operates in 159 offices across 44 countries with over 5,000 employees. Its worldwide presence powers the company's outstanding service and efficient, comprehensive global supply chain solutions. Future Electronics is globally integrated and supported by one IT infrastructure which provides real-time inventory availability and enables fully integrated operations, sales and marketing services worldwide. In 2024, Future became a WT Microelectronics company, now dual-headquartered in both Montreal, Canada and Taipei City, Taiwan.

Future Electronics' mission is always to Delight the CustomerÂ®. For more information visitÂ www.FutureElectronics.com.
