## Summary

New ResearchSafe release adds a dedicated Market Signals feature page, public changelog, feature request form, and improved navigation across product pages

## Message

TOWSON, Md. â€” June 9, 2026â€” Connectus Holdings, Inc. today announced the release of ResearchSafe v2.6, a new product update designed to make the ResearchSafe roadmap, market intelligence capabilities, and customer feedback process more visible and accessible. The latest release introduces a dedicated Market Signals feature page, available at /features/market-signals, along with a new public Feature Updates changelog that includes a built-in feature request form. The update also improves the ResearchSafe user experience by adding main navigation across all feature detail pages. ResearchSafe is an AI-powered market intelligence and product strategy platform designed to help founders, product teams, marketers, and business leaders evaluate markets, track competitors, identify product opportunities, and make more informed decisions. The new Market Signals page gives users a clearer overview of how ResearchSafe helps monitor external market activity, emerging trends, competitive movement, and other signals that may affect product and business strategy. â€œResearchSafe is being built to help teams understand where markets are moving before they commit time, capital, and product resources,â€• said Gary C. Pick, Founder and CEO of Connectus Holdings. â€œWith this release, we are making the product more transparent, easier to navigate, and more responsive to user feedback. The new Feature Updates log gives customers and prospective users a simple way to see what is improving and request what they want next.â€• The new public changelog is intended to give users a clearer view into ongoing product development. By adding a feature request form directly into the updates page, ResearchSafe is creating a tighter feedback loop between users and the product team. ResearchSafe v2.6 includes: New Market Signals feature page at /features/market-signals New Feature Updates changelog with a built-in feature request form Improved navigation across all feature detail pages The release reflects Connectus Holdingsâ€™ broader strategy of building connected, AI-enhanced business applications that help companies move from research and planning to execution. ResearchSafe is part of the Connectus product ecosystem, which includes tools for product management, sales, marketing, customer feedback, workflow automation, support, events, legal operations, and business intelligence. The ResearchSafe v2.6 update is now live at ResearchSafe.com. About ResearchSafe ResearchSafe is an AI-powered market intelligence platform built to help founders, executives, product managers, marketers, and business teams evaluate opportunities, monitor market signals, track competitors, and make more confident strategic decisions.
