## Summary

Future Electronics, a global leading distributor of electronic components, has unveiled its third-quarter digital campaign highlighting the rapidly evolving transportation market and the technologies shaping the future of mobility.

## Message

Montreal, Canada (prsafe) June 2, 2026 - Future Electronics, a global leading distributor of electronic components, has unveiled its third-quarter digital campaign highlighting the rapidly evolving transportation market and the technologies shaping the future of mobility.

As transportation systems become increasingly connected, autonomous, and intelligent, engineers are presented with unprecedented opportunities to redefine how people and goods move around the world. With the global transportation services market projected to experience significant growth over the coming decade, innovation across vehicle technologies, infrastructure, and logistics continues to accelerate.

This new campaign demonstrates how Future Electronics helps customers stay ahead of these industry shifts by providing the technologies, engineering expertise, and supply chain support needed to bring next-generation transportation solutions to market.

The campaign explores four key areas driving transportation innovation: vehicle automation, smart city infrastructure, asset tracking, and mass transit and rail. From AI-enabled sensing and connected infrastructure to wireless communications and intelligent tracking technologies, Future Electronics showcases solutions that help engineers design safer, smarter, and more efficient transportation systems.

By combining products from world-leading manufacturers with technical resources and application expertise, Future Electronics empowers customers to confidently develop innovative transportation solutions while reducing development time and accelerating product launches.

Engineers, designers, and technology innovators are invited to discover the latest solutions and insights supporting the future of transportation.
