Summary

Future Electronics is featuring the Infineon TLE9012AQU battery monitoring & balancing IC in the latest edition of their Transportation newsletter.

Message

Future Electronics, a global leading distributor of electronic components, is featuring the Infineon TLE9012AQU battery monitoring and balancing ICs in the latest edition of the Transportation newsletter.

The [TLE9012AQU by Infineon](#) is a multi-channel battery monitoring and balancing system IC that belongs to Infineon's Battery Management Sensing IC product family.

Designed for Li-Ion battery packs used in many applications on the automotive world (Electric Vehicles of any kind MHEV, HEV, PHEV and BEV, etc), industrial (Energy storage systems) and consumer (i.e. ebike BMS, home energy storage, etc), the TLE9012AQU fulfills four main functions: cell voltage measurement, temperature measurement, cell balancing and isolated communication to main battery controller. By providing the necessary diagnosis tools to ensure proper function, the TLE9012AQU IC guarantees safety of the persons around the controlled battery.

Stay on top of all the newest trends in transportation technology thanks to our Transportation newsletters. Geared toward engineers and buyers looking for new or leading-edge products, each edition is packed with product information, datasheets or videos showcasing the most advanced new technology.

Visit www.FutureElectronics.com/subscribe to receive the latest issues of the Transportation newsletter and always stay up to date with the latest innovations of the technology world. To see the entire portfolio of products available through Future Electronics, visit www.FutureElectronics.com.

About Future Electronics

Future Electronics is a global leader in electronics distribution, recognized for providing customers with global supply chain solutions, custom-tailored engineering services and a comprehensive suite of passives and semiconductor products. Founded by Robert Miller in 1968, Future Electronics has over 5,500 employees and operates in 170 offices in 44 countries around the world. Future Electronics is globally integrated, with a unified IT infrastructure that delivers real-time inventory availability and access to customers. With the highest level of service, the most advanced engineering capabilities, and the largest available-to-sell inventory in the world, Future's mission is always to Delight the Customer®.
