Summary

Robert Miller, President of Future Electronics, congratulated the company's San Diego branch, which is celebrating its 35th anniversary this year.

Message

Montreal, Canada (prsafe) June 3, 2021 - Future Electronics, a global leading distributor of electronic components, recently celebrated the 35th anniversary of the opening of the company's office in San Diego, California.

Future Electronics was founded in Montreal in 1968 by company [President Robert Miller](#). It expanded into the United States in 1972, opening its first American office in Boston.

The San Diego branch was established in 1986. "San Diego is known as 'America's finest city'," said General Manager Mike Lena. "I like to think that we have America's finest team."

Early on, the San Diego market was dominated by the Defense industry, but it has undergone many changes over the years. Today, San Diego has matured into a dynamic market with a wide range of industries including Wireless, Power, Medical, IOT and Consumer, among others. This evolution of customer make-up required Future Electronics to evolve along with it, introducing service and structure advancements that have since been adopted industrywide.

"The San Diego team is an amazing mix of people, ranging from industry veterans of 25-plus years to the next generation of electronics industry influencers," Lena said. "This diverse lineup has enabled the Future San Diego team to adjust, adapt and grow over the past 35 years, and we are excited to see what the next 35 years will bring."

Robert [Miller, President of Future](#) Electronics, congratulated the San Diego team on their 35-year milestone, and thanked everyone for their contributions to the success of the branch.
