## Summary

Future Electronics is featuring Pulse Electronics' embedded antennas in this month's edition of Sense Connect Control.

## Message

Montreal, Canada (prsafe ) July 19, 2022 - Future Electronics, a global leading distributor of electronic components, is featuring compact and reliable embedded antennas from Pulse Electronics in the latest edition of Sense Connect Control.

Pulse Electronics features a broad and customizable portfolio of embedded antenna solutions that will maintain device connectivity regardless of the circumstances.

Pulse embedded technologies result in robust board-mounted antenna designs, making them exceptionally suitable across many solutions. Their in-house manufactured embedded antenna line includes ceramic chip, patch, stamped metal, FPC, composite and active GNSS antennas, and they are among the world's smallest and most efficient.

Pulse's embedded antenna line is manufactured for a wide range of frequencies including Cellular, WiFi, BT, ISM, GPS/GNSS/Bediou and many more. They are ideal for a variety of applications such as smart meters, industrial remote control, and ISM band equipment.

## About Future Electronics

Future Electronics is a global leader in electronics distribution, recognized for providing customers with global supply chain solutions, custom-tailored engineering services and a very extensive variety of electronic components. Founded by Robert G. Miller in 1968, Future Electronics believes its 5500 employees are its greatest asset, with 170 offices in 44 countries. Future Electronics is globally integrated, with a unified IT infrastructure that delivers real-time inventory availability and access to customers. With the highest level of service, the most advanced engineering capabilities, and the largest available-to-sell inventory in the world, Future's mission is always to Delight the Customer®. For more information, visit [www.FutureElectronics.com](http://www.FutureElectronics.com).
