

Future Electronics' The Current Podcast Featured in Select List by Business Insider

News-Press Release

Pointe Claire, Quebec, (Newsbox) 15-Aug-2022

<https://prsafe.com/release/14643/>

Summary

Future Electronics own, The Current Video Podcast, has been featured in a select list for podcasts in the chip industry by Business Insider. The mention highlights our host's experience and ability to communicate in-depth electronics engineering based topics, making it one of the most relevant podcasts for people looking to dive into that business.

Message

Montreal, Canada (prsafe) August 13, 2022 - We at Future Electronics are proud to announce our most recent feature in Business Insider which brought our own video podcast, The Current, into their carefully curated list of podcasts in the chip industry.

The Current is an application technology podcast that has gained the audience trust and loyalty thanks to its engaging talks with industry-leading engineers on trending topics around the semiconductor industry. Each episode unpacks new, fast-growing, and exciting technologies, applications, and design techniques in entertaining discussions with renowned experts.

This mention on Business Insider highlights Todd Baker, our host and corporate vice-president, for his over 20 years of experience in the semiconductor field, and his ability to digest and communicate the more complex topics and trends. Todd's passionate voice brings design engineers all over the world closer to the source of the information, standing together at the edge of where technology is going.

Well within its second season, The Current now has 24 published episodes and going strong into the ever-evolving future of the tech world. Listen to all episodes and stay up to date with the latest news to spearhead the industry with Future Electronics and The Current. Find all you need here: www.FutureElectronics.com/blog/the-current-vodcast.
