## **Summary**

Future Electronics has featured the Bosch Sensortec BMI323 Inertial Measurement Unit (IMU) in the latest edition of THE EDGE newsletter.

## **Message**

Montreal, Canada (prsafe ) May 18, 2023 - Future Electronics, a leading global distributor of electronic components, recently featured the Bosch Sensortec BMI323 Inertial Measurement Unit (IMU) in the latest edition of THE EDGE.

The BMI323 has integrated features that make development faster and easier for OEMs. For example, the BMI323 already includes Bosch Sensortec's plug-and-play step counter software, so customers don't need to spend time developing their own algorithms. Other features include motion detection that can turn subsystems on or off when a device, such as a TV remote control, is put down or picked up, thus reducing overall power consumption.

To learn more about the IMU, including more tech specs and features, please visit:
