

# **i.MX 8M Nano Applications Processor from NXP Featured in THE EDGE by Future Electronics**

News-Press Release

Pointe Claire, (Newsbox) 07-Feb-2020

<https://prsafe.com/release/12474/>

## **Summary**

Future Electronics is featuring NXP's i.MX 8M Nano quad-core applications processor in this month's edition of THE EDGE.

## **Message**

Montreal, Canada (prsafe) February 7, 2020 - Future Electronics, a global leading distributor of electronic components, is featuring an applications processor for secure and affordable edge computing from NXP in the latest edition of THE EDGE.

The i.MX 8M Nano applications processor, based on up to 4x Arm Cortex-A53 cores and 1x Arm Cortex-M7 core, features an extensive set of media-centric peripherals designed to take the user experience to the next level. It delivers cost-effective integration and affordable performance for smart, connected, power-efficient devices that require graphics, vision, voice control, intelligent sensing and general-purpose processing.

THE EDGE is the latest e-newsletter from Future Electronics, and is geared toward engineers and buyers looking for new or leading-edge products. THE EDGE comes out twice per month, and each edition features product information, datasheets and videos showcasing the most advanced new technology in a specific area, such as sensing, lighting, or automotive.
