Camp Springs, Maryland (prsafe) February 14, 2021 - Insight Treatment Center, a [Maryland Addiction Treatment Center](#), has recently released a new educational resource that focuses on explaining the details of [medical assisted treatments](#) and the advantages of this mode of treatment. The new article is guided by the addiction treatment experts at Insight who have extensive experience helping clients lead healthier lives through patient-focused recovery programs. They have designed this new article to highlight medical assisted treatments and the benefits of this type of program.

Insight Treatment Centers offers readers some valuable information that can help readers to get a better understanding of medical assisted treatments and the advantages of this treatment plan. In the article, they explain how medical assisted treatments help to reduce the rate of opioid use, decrease criminal activity, reduce overdose deaths, and more. They also detail how medical assisted treatment combines mental health therapy and medication for a more holistic treatment approach. Their team hopes that patients who have a mental health disorder or are unable to overcome their challenges without medication will benefit from this type of approach.

While this new article focuses on explaining the details of medical assisted treatment programs, Insight Treatment Centers offers the full spectrum of addiction recovery programs that always center around the health and well being of patients. Their dedicated team of experts offers services that include continuing care, intensive outpatient programs, offender re-entry, recovery support services, and more. They also offer treatment options that include mental health therapy, substance abuse therapy, and substance abuse treatment. Their team prides themselves on doing everything they can to help adults lead a sober and fulfilling life.

With the addition of this new article, the team at Insight Treatment Center hopes that readers will have a better understanding of medical assisted treatments and how transformative this treatment approach can be.
