

Future Electronics Launches New Embedded Solutions Portal

News-Press Release

Pointe Claire, Quebec, (Newsbox) 16-Mar-2022

<https://prsafe.com/release/14220/>

Summary

Future Electronics'™ Intelligent Solutions division has launched a new portal focused on embedded technologies.

Message

Montreal, Canada (prsafe) March 16, 2022 - Future Electronics, a global leading distributor of electronic components, recently launched a new web portal focused on embedded solutions.

The Embedded Solutions portal is a new initiative from Future Intelligent Solutions. It features embedded boards such as System on Modules (SOMs) and Single Board Computers (SBCs) running Linux, Android, and Windows, complete with the MPUs, CPUs, and GPUs and supporting devices to enable the latest designs. Full embedded system solutions are also available, including industrial computers, solutions for AI, IoT gateways and more.

The new portal is an excellent starting point for engineers designing autonomous robots, gateways, medical systems, and other applications which demand advanced processors, intelligent vision and connectivity. Designers will benefit from Future Electronics' deep embedded hardware and software expertise to bring their ideas to market quickly, as well as 10+ years of product availability and industry-leading supply chain programs to ensure continuity of supply for all embedded designs.

Visit the new Embedded Solutions portal at www.FutureElectronics.com/Our-Solutions/Embedded-Solutions.
