Summary

Robert Miller, President of Future Electronics, congratulated the company's Philippines branch, which is celebrating its 25th anniversary this year.

Message

Montreal, Canada (prsafe) July 11, 2022 - Future Electronics, a global leading distributor of electronic components, recently celebrated the 25th anniversary of the opening of the company's offices in the Philippines.

Future Electronics was founded in Montreal in 1968 [by company President Robert Miller](#). It expanded into the United States in 1972, opening its first American office in Boston.

Future Electronics Philippines is located in Alabang Muntinlupa City, in the southern part of Manila. The office is near to the airport, walking distance from hotels, and just 20 minutes from most of Future's OEM, EMS and R&D customers.

"The situation during the pandemic took us out of our comfort zone, but we've learned a lot and we've used every available tool to adapt," said Jason Tiongco, Country Manager, Future Electronics Philippines. "We continue to find new ways to serve our customers and deliver value during these times of adversity."

The Manila branch has seen significant growth since 2017, fueled by account development, new customer acquisition and sustained DC efforts. "Without our team's dedication, resilience, and hard work, it would not have been possible to achieve and even exceed our targets during these past years," Jason said.

Going forward, Future Electronics Philippines remains focused on keeping morale up, providing relevant training, and ensuring team members keep their eyes on the goal. "I'm confident that our team will continue to reach new heights, and we'll keep growing for the next 25 years, keeping in mind that our mission is always to delight our new and existing customers."

Robert [Miller, President of Future](#) Electronics, congratulated the Philippines team on their 25-year milestone, and thanked everyone for their contributions to the success of the branch.
