Iraq Fruit Juice Market Synopsis

Iraq Fruit Juice market witnessed moderate growth during the period 2017-2020 underpinned by improving lifestyle, economic growth and rising health concerns in the country, along with rising demand for healthy food and beverages from Iraq population. The rising per capita income of the country is one of the major factors driving the growth of the fruit juice market in Iraq owing to the increasing disposable income. However, the outbreak of the COVID-19 pandemic resulted in a slow down in 2020 owing to the social distancing norms and strict lockdown imposed in the country which pushed the retail sector to a shutdown. Recovery is expected in 2021 owing to the gradual opening of retail sector and restart of the business operations which would improve the economic conditions of the country resulting in an increased purchasing power of the consumers. Iraq fruit juice market is projected to grow at a CAGR of 5.8% during 2021-2027F. The major demand for fruit juices is generated by the general public for refreshments. Rising health concerns have also pushed the population to adopt a healthy lifestyle. The COVID-19 crisis led to the shutdown of the retail sector resulting in the decline of fruit juice sales in the country. The increasing demand for fitness centers and gyms would further propel the demand for fruit juices for refreshment. The rising imports of fruits and juices would accelerate the local production of fruit juices in the country. Offline distribution channel held the majority share in the Iraq fruit juice market as a result of the ease of shopping in the retail stores and the high availability of fruit juices in small shops to large supermarkets. The instant consumption of fruit juices bought through retail stores is one of the major factor for the dominance of offline distribution channel. Market By Product Types

Juice drinks led the fruit juice market on account of its high availability across the retail stores and its low price compared to the other counterparts. In the forecast period, juice drinks are expected to retain their dominance in the fruit juice market owing to its high water content and the ability to quench thirst in hot summers. Additionally, Nectars, Juice drinks, and concentrates are the other key product categories in the Iraq fruit juice market. Market By Distribution Channels

Offline distribution channel dominated the fruit juice market in 2020, owing to the convenience provided by retail sectors and the high availability of fruit juices in small shops to large supermarkets. The instant consumption of fruit juices bought through retail stores is one of the major factor for the dominance of offline distribution channels. Key Attractiveness of the Report
